

SAND GOANNA

All our Snorkel Courses are Accredited and Registered under the Australian Quality Training Framework (ATQF) this allows us to deliver and assess Nationally Recognised Qualifications through statements of Attainments from the Sport and Recreation Training Package.

We only teach the most up-to-date techniques, materials and use quality industry approved equipment and focus on 'hands on' scenario based learning which helps produce more confident and skilled Snorkellers.

Our Courses can be conducted at our fully Equipped Training centre's or On Site (We come to you) and group training can be provided during the day, evenings or on weekends. We are completely flexible and our aim is to equip you with the knowledge, skills, techniques and practices to improve the Snorkel/Dive industry.

After consulting with one of our friendly staff members, you will see our ambition is to look after all your training needs.

FACE TO FACE

Traditional, face to face training remains available and is still the preferred methods of delivery for many people and organisations. This method of learning allows for greater interaction between students & trainers during the theory component of the training and is often useful where language or technology barriers exist.

ONLINE (WEB TUTORIAL)

Online Workbook Theory - Online & workbook theory saves time, is convenient and saves money in lost productivity, transport and other training costs.

WORK BOOK

Work book theory – Once again saves you time and money simple enroll in a course and we will post out the courses notes to you, when completed bring in or send it back. (Self paced)

flexible solutions for your training needs

Sand goanna offers a wide range of diversified Snorkelling Courses at Competitive prices. Our Aim is provide Quality Industry Training and techniques at a reasonable price. We pride ourselves as a company that place's Trust and Honesty before profit, any savings we make we pass any savings onto our clients.

FREE NEEDS ANALYSIS

Every workplace, industry or other environment is unique. For companies and organisations requiring training or ongoing up skilling training, we offer free needs analysis to identify your key focus point specific to your environment, these may include environmental, mechanical or man made risks which present injury risks uncommon to other organisations. We're able to modify our course structure to accommodate your unique requirements.

ONLINE THEORY & WORK BOOKS

So, how does it all work? - It's simple, whether or not you have access to a computer or the Net, you can undertake your Theory Training & Assessment for a number of our courses 'prior' to attending your Practical Training & Assessment day by selecting Online or Workbook systems. Self Paced Learning - When using our unique Online or Workbook systems, you can simply undertake your training and assessment when it's convenient for you, prior to attending your Practical Training Day. There's means there is less pressure to perform in a "exam like" situation.
