Students undertaking a course as part of a work based traineeship will be assessed in the workplace.

This unit will be assessed in conjunction with SROODR003B - Co-ordinate Recovery of a 4WD Vehicle Using Advanced Techniques

Recognition of Prior Learning

Participants with previous training and/or experience may apply for RPL. Participants, who have completed courses with equivalent / matching learning outcomes, will be granted credit transfer.

Accreditation

Qualifications granted by Sand Goanna are accredited through the NSC and are nationally recognised throughout Australia under the (AQTF) Australian Quality Training Framework. In association with National Training Provider Num: 31486

Course Structure

To achieve a unit of competency you must first be found satisfactory in all areas of assessment

For this unit this consists of the following:

- Seven Elements (7)

Alternate elements must be deemed satisfactory before a student can be deemed competent in order to be confirmed with evidence acceptable under the AQTF

For this qualification, students may choose many ways to experience competency. These can be in the form of practical, theoretical and RPL.

All areas must meet the units rules and regulations as well as any, local industry requirements and the characteristics of this qualification.

This course meets the requirements for the Training Package (SRO) qualification SRO40206

Competency Unit Elements

Unit Code/Element	Element Name
SRO DRV 003B/01	Operate in a safe manner.
SRO DRV 003B/02	Operate in an environmental friendly manner
SRO DRV 003B/03	Use dynamic recovery equipment to recover a four wheel drive vehicle up a steep incline.
SRO DRV 003B/04	Use vehicle recovery equipment.
SRO DRV 003B/05	Use a winch to recover a four wheel drive vehicle.
SRO DRV 003B/06	Demonstrate the safe use of jack's.
SRO DRV 003B/07	Maintain vehicle recovery equipment.
